User Lifecycle Management - Level II	67%

This performance report provides a high-level breakdown in the form of the percentage of questions you passed within each section of this exam. To help you better understand how well you performed, reference the [Okta Certified Administrator Maintenance Exam Study Guide](#).

Use this report to:

- Determine your strengths and weaknesses.
- Prepare better for a subsequent attempt of this exam if you did not pass on this attempt.

Do not use this report to attempt to determine the passing score for this exam or your final score:

- Okta does not disclose the passing scores for certification exams and certification maintenance exam, so you can only make assumptions.
- The number of questions you answered correctly and the number of points you received for answering those questions correctly are two separate elements. While you may be able to estimate the number of questions you answered correctly with a degree of accuracy, since we do not disclose the point-value for each question, you will not be able to determine your overall score or the passing score for this exam.
